March 17, 2021

The Honorable Jeff Merkley
Chair
Subcommittee on Interior,
Environment and Related Agencies
Committee on Appropriations
United States Senate
Washington, D.C. 20515

The Honorable Lisa Murkowski
Ranking Member
Subcommittee on Interior,
Environment and Related Agencies
Committee on Appropriations
United States Senate
Washington, D.C. 20515

Dear Chairman Merkley and Ranking Member Murkowski:

Thank you for increasing funding for key Bureau of Land Management (BLM) accounts in the FY2021 Interior, Environment and Related Agencies Appropriations bill. As you prepare the FY2022 Interior Appropriations bill, we encourage you to build on that important work by including at least \$21.131 million for BLM's cultural resources account and at least \$65.131 million for the National Conservation Lands.

The BLM manages the largest, most diverse, and most scientifically important body of cultural, historical, and paleontological resources of any federal land management agency. Yet only about 10 percent of BLM lands have been surveyed for cultural resources. We urge the Committee to provide at least \$21.131 million—an increase from FY2021 of \$1.5 million—for the BLM's cultural resources management account to help BLM fulfill its statutory requirements to inventory and protect cultural resources, manage paleontological resources, and improve government-to-government consultation with Indian tribes. This modest increase in funding would also support ongoing collaboration with state historic preservation officers in the West to standardize and integrate cultural resources data for BLM lands through the National Cultural Resources Information Management System (NCRIMS).

This effort is a significant and often overlooked preservation success story. It funds predictive modeling and data analysis, in partnership with state historic preservation offices, to support planning for large scale cross-jurisdictional and other projects. It promotes streamlined land-use planning by making better cultural resource data available early in the planning and project development process.

The BLM also needs increased funding for management of its system of National Conservation Lands, which is made up of nationally significant places designated by Congress or the President for their outstanding historic, cultural, ecological, and scientific values. The National Conservation Lands encompass more than 37 million acres of National Monuments, National Conservation Areas (NCAs) and similar designations, as well as Wilderness and Wilderness Study Areas (WSAs).

The National Conservation Lands have nearly doubled in size since its inception in 2000.¹ Since FY2006, when Congress provided BLM with \$65.131 million to manage the system, more than 100 units and 11 million acres have been added,² including millions of acres designated by Congress through the Omnibus Public Land Management Act of 2009 (P.L. 111-11) and the John D. Dingell Jr. Conservation,

_

¹ See Table 1

² See Table 2

Management and Recreation Act of 2019 (P.L. 116-9). Despite the dramatic growth of the system, annual appropriations to manage these important places has not kept pace, with the FY2021 appropriation being 10 percent less than FY2000 appropriation, and only 70 percent of the FY2006 appropriation.³

We urge you to consider the additional demands BLM is responsible for – and the increasing popularity of these lands – and provide a sharp increase in base funding for the National Conservation Lands. Remarkably, this increase would restore program funding to its FY2006 funding level. Such an increase is needed to properly administer the system's expansion by 18 million acres since 2000, and will permit increased inventory, monitoring and protection of cultural resources, enhance proper management of all resources and provide a quality visitor experience. Such an increase also reflects the important role the National Conservation Lands will play in meeting President Biden's goal to "conserv[e] at least 30 percent of our lands and waters by 2030."

Additional funding should be directed toward ensuring each unit of the National Conservation Lands is appropriately staffed with land managers, law enforcement, and cultural resources experts, as well as inventory and monitoring of cultural resources that contribute to the special designation of these places. We also recommend robust funding for National Scenic and Historic Trails, National Wild and Scenic Rivers, and wilderness areas that are part of the National Conservation Lands and funded through other areas of the BLM's budget.

We appreciate the Committee's concerns with the impacts of the Trump Administration's reorganization of the BLM. We know that much work will be required to restore the agency's capacity to fulfill its mission, including filling a remarkable number of staff vacancies. We encourage you to specifically address the long-standing vacancies in key cultural resources positions stipulated in the BLM Tribal Relations Manual, including the National Curator/NAGPRA Coordinator, National Tribal Coordinator, and 10 of the 12 state office Tribal Coordinator positions.

Our nation's public lands contain remarkable and irreplaceable ecological, historical and cultural resources that reflect thousands of years of human connection to our lands. We thank you for your consideration of our request in the FY2022 Interior, Environment and Related Agencies Appropriations bill.

Sincerely,
